Address
Negombo, Sri Lanka

Education

Kandy | Sri Lanka | 2015-2019

BSc. Honours, Computer Engineering Specialization

University of Peradeniya

Expertise

- Languages: C#, SQL, Python, JavaScript, jQuery, Java, C++, C
- Databases: MSSQL, MongoDB, MySQL, PostgreSQL
- Web Development: .NET, Angular, React, HTML, CSS
- Cloud Services: Azure, AWS
- Methodologies: Scrum
- Version Control: Git

Work Experience

- Sri Lanka | Jun 2024 – Present

  Zone 24X7
  Senior Software Engineer

  - Leveraged AI-powered tools such as Windsurf to drive end-to-end development, including prompt engineering, requirement analysis, architectural design, and implementation.
  - Utilized AI agents to accelerate development cycles, automate code generation, and enhance solution quality.
  - Assisted in architectural decisions, code reviews, and best practice implementations to enhance team efficiency.
  - Communicated with clients to gather and analyze requirements, ensuring alignment with project goals.
  - Mentored and guided junior developers, providing technical support and career development advice.
  - Collaborated with cross-functional teams to deliver high-quality solutions on time.

- Sri Lanka | Jan 2022 – Jun 2024

  DUBLIW
  Senior Software Engineer

  - Develop and deploy back-end main and appended services using C# and .Net Core, following a Layered Architecture approach and Minimal API.
  - Maintain automated services using Azure Functions, Service Buses, Logic Apps, and Storage Accounts in Azure.
  - Manage thousands of records in Azure Identity Database using MSSQL and Dapper.
  - Migrated Users from legacy .NET authentication to Azure B2C offers a modernized approach to user authentication.
  - Create interactive user interfaces using jQuery and Angular for front-end development.
  - Manage and import large volumes of data to the main web service using MongoDB.
  - Manage communication services using Twilio, SendGrid, Sly Broadcast, and Pcm Integration.

- Singapore | Feb 2019 - Jun 2020

  THE SOFTWARE PRACTICE
  Software Engineer

  - Developed back-end services using .Net Core and C# following the MVC architecture. Loaded OOXML worksheets to controllers to generate new worksheets.
  - Managed Database using MSSQL Identity Database Management and Entity Framework Core.
  - Followed TDD approach to ensure code reliability by writing unit tests using NUnit for every feature.
  - Orchestrated deployment of app services to Azure Web Services.

- Sri Lanka | Oct 2017 – March 2018

  TIQRI
  Software Engineer Intern

  - Implemented an Authentication System using NFC technology using C# and .Net Framework, as a substitute for RFID tags.
  - Developed an Event Management System Platform for organizing and managing events using Angular for front-end development.
  - Followed Agile Methodology for software development.

Certifications

MICROSOFT CERTIFIED: AZURE DEVELOPER ASSOCIATE — Azure
Credential ID: A5F06501B32FCC72 - December 2023

MICROSOFT CERTIFIED: AZURE FUNDAMENTALS — Azure
Credential ID: 9F41332716D2F6B7 - July 2023

Projects

FINAL YEAR PROJECT 2018 - BSC. ENGINEERING — C#, .Net, HTML/CSS
Portable Executable Scanner - Extracted information inside an executable and identified solutions for dependency issues.

AZURE B2C USER MIGRATION APPLICATION — C#, .Net, Azure, XML
Implemented an application for migrating local users from Azure AD B2C.

SLIIT ROBO FEST CHALLENGE AND SAITM ROBOTICS CHALLENGE 2016 — C++, Arduino
Participated in and implemented a robot capable of finding the finish line in a mesh.

REMOTE ARM ARDUINO APPLICATION 2018 — C++, Arduino
Team member of "Remote Arm" Arduino application. A wearable device that remotely controls a robot arm. The device uses the location of the human hand to move the hand of the robot arm but not imitate it.
